LABEL VISION SYSTEMS OFFERS THE 5.0 MP CAMERA WITH ALL INTEGRA 9510 BAR CODE VERIFICATION SYSTEMS

Peachtree City, GA – April, 2012 – Label Vision Systems (LVS®), the leading manufacturer of print quality vision inspection and verification systems, today announced the INTEGRA 9510 desktop bar code verifier is available for purchase with a 5.0 megapixel (MP) camera only.

Over the past year, the top selling INTEGRA 9510 bar code verifier has been available for purchase with a 1.3 mp and 5.0 mp camera. “Although the 1.3 mp camera provides clear and sharp images, the 5.0 mp camera provides exceptional image quality and higher resolution for increased image detail,” says Tim Lydell, CEO of LVS®.

“The demand for exceptional image quality is paramount in print quality inspection and bar code verification,” Lydell says. “Producing our top selling desktop barcode verifier with only the 5.0 mp camera allows LVS® to simplify the product selection by having only one verifier to choose, as well as offer the INTEGRA 9510 at a lower system price due to a streamlined manufacturing process.”

The INTEGRA 9510 is designed for offline verification of bar codes to ISO/IEC standards and verifies linear (1D) and two-dimensional (2D) codes, including QR, Aztec and USPS Intelligent Mail (also referred to as 4-State) bar codes. The INTEGRA 9510 is unique in the world of ISO verification due to its ease of use and ability to perform the following:

- Determine the correct aperture for each bar code symbol
- Auto-discriminate the bar code symbology and narrow bar width
- Detect and highlight quality issues in the bar code

The INTEGRA 9510 offers four available fields of view ranging from 3 inches (76 mm) to 6.250 inches (159 mm). A unique “stitching” feature allows grading of barcodes exceeding 6.250 inches (159 mm) in length.

For over 30 years, LVS® has designed, developed and manufactured print quality vision inspection and verification systems, leveraging our patented methodology in bar code imaging and ISO (ANSI) bar code grading. LVS® has installations in over 35 countries and maintains a commitment of excellence to our customers, the print industry and the vision products we produce.

LVS® is ISO 9001:2008 certified and is proud to be a GS1 US Solution Partner.
